(54) Title: COMPUTER GAME SYSTEM AND METHOD OF OPERATION

(57) Abstract: A method of operating a computer game program (10;20) comprising the steps of, loading the computer game program, executing the computer game program, receiving instructions from a user interface, changing the game status according to the instructions, and charging a user to store the game status. The excitement of playing the game is increased for a user whilst increasing the profitability for right-owners of the game. The system may be an integrated computer device, such as a PC, or a distributed architecture.
